

More single-use plastic items are being phased out in Queensland
Over the next 5 years, the Queensland Government will implement bans and other measures to help minimise waste and protect our environment. The National Retail Association has been engaged to help businesses learn more about these initiatives and how to move towards more sustainable choices.

Starting 1st September 2023 all plastic shopping bags must meet new requirements and be made from 80% recycled content, as well as carry 10kg for 125 uses as verified by reusability test.

EN 13590 & EN CCD100
